DETAILED ACTION

Election/Restrictions

- 1. Upon reviewing the Applicant's arguments with respect to the Restriction requirement dated on 10/04/2004, the Restriction is withdrawn. A new Restriction requirement is issued below.
- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-34 and 42-49, drawn to a scale for a miter saw, classified in class 83, subclass 468.
 - II. Claims 35-41 and 50-54, drawn to a locking mechanism for a miter saw, classified in class 83, subclass 375.
- Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as it can be used in a miter saw assembly that does not have a scale. See MPEP § 806.05(d).
- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 5. If Applicant elects Invention I, Applicant is required to further elect a single disclosed species from each of the following groups:

Group 1:

Species A: the scale magnifier having an angular movement with respect to an angular movement of the bevel housing in a 1:1 ratio.

Species B: the scale magnifier having an angular movement with respect to an angular movement of the bevel housing less than a 1:1 ratio.

Species C: the scale magnifier having an angular movement with respect to an angular movement of the bevel housing greater than a 1:1 ratio.

Species D: the scale magnifier having an angular movement with respect to an angular movement of the bevel housing not being a 1:1 ratio.

Group 2:

Species E: the rotary mechanism of the measurement section including a gear.

Species F: the rotary mechanism of the measurement section including a pulley.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, some claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

4

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phong H Nguyen whose telephone number is 703-305-4989. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap can be reached on 703-308-1082. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you
